Guido Delponte

Python Backend Developer (FastAPI) | Network & NOC Automation
Buenos Aires, Argentina · guido_delponte@hotmail.com · https://github.com/GDelpo ·
https://www.linkedin.com/in/guido-delponte-7a26033a4/

Summary

I've been building software since 2018, and my focus is automation: taking manual tasks away and getting systems to talk to each other. Since 2026 I've been building and running Python tools for Ciena's NOC, on ScienceLogic SL1 and Ciena 6500, SAOS and Waveserver gear.
Before that, I built 8 FastAPI services and integrations with Argentina's tax authority and insurance regulator at an insurer. I started in technical support and networking, so I can follow a project all the way through: work out what's needed, build it and get it running.

Work Experience

NOC Automation Developer
Ciena · April 2026 – Present
- Built from scratch and maintain tested Python tools for Ciena optical and Ethernet devices (TL1, SSH, SNMPv3), with parallel execution across fleets, plus a read-only one for Cisco.
- Rebuilt and extended the team's scripts into a Python CLI with resumable batches to onboard devices into ScienceLogic SL1, used in real customer onboardings.
- Built a Python command to change device availability in bulk in SL1, with a prior plan, canary, explicit run and per-run revert commands.
- Configured SNMPv3 and accounts on a customer's optical devices, in change windows, with my own Python tools.
- Tested the alarm path into SL1 with test events across a customer's optical network and delivered the report.
- Built and maintain the NOC knowledge base, in English.
- Building a Python tool that compares each customer's active alarms with SL1 events and flags each difference once (in pilot).
- Wrote SL1 Dynamic App snippets for Waveserver, validated in the lab.
- Enrolled devices in the backup system at management's request, starting with a canary.
- Built commands to clean up duplicate and expired events in SL1.
- Built read-only report commands on monitoring, backups and credentials.
- Built per-customer circuit tables from device captures for event correlation.

Python Developer & Systems Analyst
Noble Seguros · December 2020 – April 2026
- Built policy delivery automation: SQL Server reads, missing-PDF checks, Google Cloud Storage sync and email, with async workers, dry-run and a manual review queue.
- Built 8 FastAPI services with Docker, adding Redis and JWT auth where needed: identity with LDAP, multi-provider email, storage, helpdesk and cancellations.
- Built the Django app that records investment operations and submits them to the SSN regulator's API, with Excel import and deadline alerts.
- Integrated the AFIP/ARCA SOAP web services (WSAA, taxpayer registry) into a Python package with a YAML catalog and a REST API.
- Led the rollout and production release of NobleOnline, the digital platform for insurance brokers.
- Maintained, refactored and optimized legacy PHP systems.
- Gathered requirements, analyzed internal systems and defined improvements to them.
- Set up service observability with Loki, Promtail and Grafana, including email alerts.
- Automated the monthly invoice download over SFTP.
- Set up and structured the technical documentation in Docusaurus.
- Audited, tracked and optimized services from external vendors.

Software Developer & Technology Consultant
Self-employed · December 2018 – Present
- Built an installment sales platform for a client (projects, lots, payments) with FastAPI and React, role-based access and configurable branding and 230 tests.
- Built saldAR, a multi-currency shared-expenses app with FastAPI, Next.js, PostgreSQL, Redis and CI (not deployed yet).
- Delivered client sites with WordPress + Elementor and with React on Cloudflare Workers.

- Built a Python engine that generates branded PDFs from schema-validated JSON contracts, with a web form, Docker and 462 tests (no external clients yet).
- Modernized legacy systems, ran technology migrations and integrated them with new solutions.

Sports Event Operations Assistant
Maratón de Buenos Aires · October 2017 – October 2019
- Resolved incidents and contingencies at mass 10K, 21K and 42K races to keep operations running.

IT Support & Administration
Laboratorio Dr. Enrique Iovine · April 2015 – November 2020
- Ran and maintained the laboratory's computers and network.
- Supported users and resolved hardware and software incidents.
- Installed, configured and maintained security systems and IP cameras.
- Administered LabWin, the internal management system, including data entry and updates.

Skills

Backend: Python, FastAPI, Pydantic, SQLAlchemy, Alembic, SQLModel, Django, ARQ, Laravel, PHP
Network automation and monitoring: ScienceLogic SL1, SNMPv3, SSH, TL1, Paramiko, PowerFlow, Ciena 6500, Ciena SAOS, Ciena Waveserver, Cisco IOS, Grafana, Loki
Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, WordPress, Cloudflare Workers
Data and databases: SQL, PostgreSQL, SQL Server, Redis, Google Cloud Storage, pandas
Development tools: Docker, pytest, GitHub Actions, Git, GitHub, Playwright
Documentation and project management: MkDocs, Docusaurus, Jira

Education

- Software Development · ISTEA · 2025 – 2027 · In progress
- Systems Analyst · ORT Argentina · 2019 – 2022

Certifications

- Professional Certificate in Artificial Intelligence · ITBA Universidad · 2024
- FastAPI: The Complete Course (Beginner + Advanced) · Udemy
- Python University: From Zero to Expert · Udemy
- Design Patterns · EducacionIT · 2023
- UML and UP: Object-Oriented Analysis and Design · EducacionIT · 2023
- Microservices with Spring Boot and Spring Cloud Netflix Eureka · Udemy
- RESTful APIs with Laravel: The Definitive Guide · Udemy
- Frontend Development · Plataforma 5 - Coding Bootcamp
- Git: Collaborative Development · EducacionIT · 2022
- JavaScript from Scratch · EducacionIT · 2022
- Introduction to the Object-Oriented Paradigm · EducacionIT · 2022
- Introduction to Databases and SQL · EducacionIT
- HTML5: Web Fundamentals · EducacionIT · 2022
- Java for Non-Programmers · EducacionIT · 2021
- Functional Analysis · EducacionIT
- Professional Webmaster: Web Development · Centro de e-Learning UTN FRBA · 2018
