## Summary

I've been building software since 2018, and my focus is automation: taking manual tasks away and getting systems to talk to each other. Today I build and run Python tools for Ciena's NOC, on ScienceLogic SL1 and Ciena 6500, SAOS and Waveserver gear.
Before that I built FastAPI services and AFIP and SSN integrations at an insurer. I started in technical support and networking, so I can follow a project all the way through: work out what's needed, build it and get it running.

## Work Experience

**NOC Automation**
Ciena · April 2026 – Present
- Build and maintain Python tools for Ciena optical and Ethernet gear and for Cisco devices (TL1, SSH, SNMPv3), with parallel fleet execution.
- Refactored and extended team scripts into a Python CLI with resumable batches for onboarding devices to ScienceLogic SL1, used in real customer onboardings.
- Changed the monitoring settings of 144 customer devices in under 2 minutes with zero failures, using a plan, check, explicit execute and revert workflow.
- Configured dozens of optical devices in customer change windows with zero failures, fixing the tooling on the spot when firmware differed from the lab.
- Tested the alarm path end to end on one fleet: 78 of 80 devices confirmed.
- Created 40 read-only report commands on monitoring, backups and credentials across 3 regions.
- Delivered circuit tables for 10 customers for event correlation.
- Built and maintain the NOC knowledge base, in English (188 pages).

**Python Developer & Systems Analyst**
Noble Seguros · December 2020 – April 2026
- Built policy delivery automation: SQL Server reads, missing-PDF checks, Google Cloud Storage sync and email, with async workers, dry-run and a manual review queue.
- Built 8 FastAPI services with Docker, adding Redis and JWT auth where needed: identity with LDAP, multi-provider email, storage, helpdesk and cancellations.
- Built the Django app that records investment operations and submits them to the SSN regulator's API, with Excel import and deadline alerts.
- Integrated AFIP/ARCA SOAP web services (WSAA, taxpayer registry) into a Python package and a REST API.
- Led the rollout and production release of NobleOnline, the digital platform for insurance brokers.
- Maintained, refactored and optimized legacy PHP systems.
- Gathered requirements, analyzed internal systems and defined improvements to them.
- Set up service observability with Loki, Promtail and Grafana, including email alerts.
- Set up and structured the technical documentation in Docusaurus.
- Audited, tracked and optimized services from external vendors.
- Worked with technical teams and business stakeholders to keep deliverables tied to their goals.

**Software Developer & Technology Consultant**
Self-employed · December 2018 – Present
- Built an installment sales platform for a client (projects, lots, payments) with FastAPI and React, role-based access and configurable branding.
- Built saldAR, a multi-currency shared expenses app with FastAPI, Next.js, PostgreSQL, Redis and CI (beta, not launched).
- Delivered client sites with WordPress + Elementor and with React on Cloudflare Workers.
- Built a Python engine that generates branded PDFs from JSON data, with Docker.
- Built APIs and integration architectures to connect systems and platforms.
- Modernized legacy systems, ran technology migrations and integrated them with new solutions.
- Advised clients on defining and implementing their technology solutions.

**Sports Event Operations Assistant**
Maratón de Buenos Aires · October 2017 – October 2019
- Resolved incidents and contingencies at mass 10K, 21K and 42K races to keep operations running.

• Coordinated with operations, logistics and staff teams during each event.
• Assisted runners and participants before, during and after each race.
• Wrote post-event reports, analyzed critical situations and implemented improvements for later editions.

**IT Support & Administration**
Laboratorio Dr. Enrique Iovine · April 2015 – November 2020
• Ran and maintained the laboratory's computers and network.
• Supported users and resolved hardware and software incidents.
• Installed, configured and maintained security systems and IP cameras.
• Administered LabWin, the internal management system, including data entry and updates.
• Handled administration and accounting: billing to health insurers, account control and collections.
• Coordinated logistics for the blood-draw team, including routes and resources.

## Skills

**Backend:** Python, FastAPI, Pydantic, SQLModel, Django, Flask, Laravel, PHP, Java, Spring Boot, Spring Cloud
**Network automation and monitoring:** ScienceLogic SL1, PowerFlow, Ciena 6500, Ciena SAOS, Ciena Waveserver, TL1, SSH, SNMPv3, Cisco IOS, Grafana, Loki
**Frontend:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, WordPress
**Data and databases:** SQL, PostgreSQL, SQL Server, Redis, Google Cloud Storage
**Development tools:** Git, GitHub, Docker, pytest
**Documentation and project management:** MkDocs, Docusaurus, Jira
**Support and infrastructure:** Network and connectivity administration, Full hardware and software maintenance, Security system and IP camera setup

## Education

• Software Development · ISTEA · 2025 – 2027 · In progress
• Systems Analyst · ORT Argentina · 2019 – 2022

## Certifications

• Professional Certificate in Artificial Intelligence · ITBA Universidad · 2024
• FastAPI: The Complete Course (Beginner + Advanced) · Udemy
• Python University: From Zero to Expert · Udemy
• Design Patterns · EducacionIT · 2023
• UML and UP: Object-Oriented Analysis and Design · EducacionIT · 2023
• Microservices with Spring Boot and Spring Cloud Netflix Eureka · Udemy
• RESTful APIs with Laravel: The Definitive Guide · Udemy
• Frontend Development · Plataforma 5 - Coding Bootcamp
• Git: Collaborative Development · EducacionIT · 2022
• JavaScript from Scratch · EducacionIT · 2022
• Introduction to the Object-Oriented Paradigm · EducacionIT · 2022
• Introduction to Databases and SQL · EducacionIT
• HTML5: Web Fundamentals · EducacionIT · 2022
• Java for Non-Programmers · EducacionIT · 2021
• Functional Analysis · EducacionIT
• Professional Webmaster: Web Development · Centro de e-Learning UTN FRBA · 2018

## Languages

• Spanish · Native
• English · Full professional proficiency
